FOR IMMEDIATE RELEASE

LSNE ANNOUNCES A REBRANDED IMAGE

To celebrate 15 years in business, LSNE Contract Manufacturing is announcing a new logo.

Manchester, NH - Lyophilization Services of New England (LSNE), a New Hampshire based contract manufacturing organization, has launched a new corporate logo this week to celebrate 15 years in business. LSNE has grown significantly and with this growth comes a rebranded image to reflect the expanded service offerings and advancement of the company. The revitalized brand symbolizes LSNE's strong customer focus and continued commitment to its clients.

The logo, a part of an overall effort to redesign the brand, presents a more modern reflection of the company and its plans for the future while still representing its scientific and technical foundation. "We hope this logo reflects the global nature of our business rather than the regional nature of our previous logo," said LSNE President, Matthew Halvorsen. The updated logo will be launched in parallel with a redesigned website and marketing material to increase the recognition of the LSNE brand.

About LSNE Contract Manufacturing

LSNE Contract Manufacturing is a privately held company with three cGMP compliant facilities located in New England. LSNE has been providing lyophilization services to the pharmaceutical, biotechnology and medical device industries since 1997, specializing in a wide range of services such as cycle development and cGMP fill/finish and lyophilization. Through the thoughtful integration of three processing facilities, qualified staffing, and an extensive manufacturing history, LSNE is strategically positioned to provide uninterrupted material for clinical through commercial supply.
