FOR IMMEDIATE RELEASE

## LSNE CONTRACT MANUFACTURING SHOWCASES LYOPHILIZATION OF NON-AQUEOUS FORMULATIONS

**Manchester, NH**, – Lyophilization Services of New England (LSNE), a global leader in contract services for the pharmaceutical and medical device industries, is proud to showcase their capability and expertise in the lyophilization of drug substance, raw material, intermediates, drug product, and medical devices formulated with organic solvents.

“We are very excited to be featuring our capabilities in formulation and lyophilization of challenging products that are using organic solvents at Contract Pharma’s 13<sup>th</sup> Annual Contracting and Outsourcing Conference in New Jersey”, said Shawn Cain, LSNE’s Chief Operations Officer. “The response that we have received from our customers has been extremely positive. They are impressed by the quality, flexibility, as well as the breadth of our service offerings.”

The number of CMOs offering cGMP aseptic liquid fill/finish for non-aqueous formulations is limited and the number of CMOs able to successfully lyophilize such formulations is even smaller still. LSNE conducts a risk based assessment when working with organic solvents from both a safety and equipment view point. Facility and equipment maintenance procedures are evaluated to work comfortably with non-aqueous formulations while maintaining our quality, safety, and flexibility to operate at a high level of performance with our clients who are developing traditional aqueous formulations.

“LSNE is committed to providing innovative aseptic solutions for our clients and this is achieved by listening to our clients to not only support their needs of today, but with future ground breaking technology”, said Christine Palus, Vice President of Sales and Marketing.

### **About LSNE Contract Manufacturing**

LSNE Contract Manufacturing is a privately held company with three GMP facilities located in New England. LSNE has been providing contract lyophilization services to the pharmaceutical, biotechnology and medical device industries since 1997, specializing in a wide range of services including cycle development, cGMP fill/finish, and lyophilization. Through the thoughtful integration of three processing facilities, qualified staffing, and an extensive manufacturing history, LSNE is strategically positioned to provide uninterrupted manufacturing for clinical through commercial supply for medical device and pharmaceuticals to a multi-national market.
